

PANEL FASTENERS/SNAP-IN

CHRISTMAS TREE™ CLIPS SINGLE HEAD

Unique ribbed shank design ensures fast, easy installation and secure holding in wide range of materials. Several head and point styles available.

Installation—As clip is pushed into place ribs deflect and then spring back after they pass through hole. Works effectively in prepared or blind holes.

*Due to the unique prong design the recommended panel thickness range can be exceeded in certain applications. Christmas Tree Clips do not have to extend beyond the panel and will hold securely in blind holes if the panel material is softer than the Christmas Tree Clip (i.e., wood, particle board, rigid foam, etc.)

**Grained surface.

NOTE: Not all parts have fin design shown.

NOTE: Dimensions listed are nominal.
